EXPERIENCE

Senior Financial Analyst – Keurig Dr Pepper – Dallas, TX

October 2023 – December 2025

- Managing \$6M in variable & fixed expenses of 11 production lines, achieving a \$75k monthly reduction in costs
- Minimizing yield loss by \$200k monthly by refining reporting processes and increased transparency. Trained staff at multiple sites on report utilization, to help reduce our \$20M company-wide yield loss
- Saved 25% OT expense per production line through enhancing reporting and improved communication & visibility
- Performed cost optimization analysis across labor, fixed, and variable cost structures, identifying opportunities to improve operating efficiency and enhance profitability.
- Built business case scenarios for incremental production growth, evaluating variable cost impacts, capacity requirements, and risks to support strategic investment decisions.

Senior Financial Analyst – Penske Logistics – Dallas, TX

February 2022 – April 2023

- Develop annual budgets & business plans including analysis of revenue, labor, variable/fixed costs & capital investments, & present to executive management, satisfying all FP&A & accounting governance and control
- Work in partnership with operations to provide and explain weekly & monthly forecasts, including financial performance, variance explanations, & cost analysis to management
- Prepare and deliver presentations to leadership (budget, forecast, performance tracking)
- Managing portfolio of 7 warehouse accounts with revenue ranging from \$150k to \$3 million monthly
- Assist pricing team through new rate proposals & support leadership team on ad hoc requests

Financial Analyst – SWBC – San Antonio, TX

March 2020 – February 2022

- Developed over 20 budget Excel workbooks for over 70 cost centers for EVPs & direct reports
- Evaluated & interpreted cost variances for variety of products on a monthly basis to identify irregularities, market swings, & corrective action
- Performed cost analysis based on products & client - identified incorrect posting of \$90k, which impacted a Sales Rep by \$8k in commissions. Further research uncovered \$358k of incorrect postings & worked with accounting to correct postings & mapping table
- Developed data models for financial statements for expense performance, P&L, & balance sheet
- Maintained customized reports & interactive performance charts for KPI tracking

Actuarial Associate – AIG - Houston, TX

November 2016 – October 2019

- Improved development stage from 20 days to 15 days by coordinating with project managers to support & implement nationwide client facing website deployments
- Worked with clients to identify, assess, aggregate & document risks & controls, including risks associated with new or modified products, & distribution channels
- Mentored 4 junior analysts that all became project leads within 6 months across multiple projects; led team of 7 supporting cross-functional projects, professional development, & efficient resource utilization
- Delivered analytical explanations, validations, and recommendations to upper level non-actuarial audience, that helped strategize AIG's life insurance products to be more competitive
- Proactive data analysis on new product calculations utilizing testing tools for desktop & website, throughout all phases of project development cycle
